

Riletto bedroom furniture

Composition of natural wood and leather.

The harmonious interplay of natural wood and leather is characteristic of the Riletto night stands and chests of drawers. Leather-covered sides matching the Riletto bed with leather sides also form an attractive contrast to the elegant natural wood of the night stands and chests of drawers.

Handleless fronts particularly emphasize the vibrant nature of the sensual natural wood. Drawers are fitted with high-quality touch fittings to open and close gently.

Whether with base, for mounting on the wall or with comfortable bench: the Riletto chests of drawers are available in so many varieties that they are bound to include one for every taste.

Available in 8 different solid European Hardwoods, with various colors of leathers available for side details.

Various Dimensions and configurations are available. Please inquire within for additional information.
