

S1 chair

Your new favourite seat!

The S1 chair has an optimal ergonomic design and is extremely comfortable, made of specially selected natural wood that has been treated only with natural herb oil: a timeless design in the tradition of hand-crafted production. The comfortable S1 chair is offered in three different versions:

with seat and backrest in natural wood
with seat in natural wood and backrest upholstered with leather
with seat and backrest upholstered with leather

Seven different types of wood and 23 leather colours ensure creative freedom in each individual case. The natural grain and unfinished edge seaming give the thick leather version of the chair an even more authentic feel and look.
