

# Portello Side Table

A stalk with two little flower petals. As colourful as you like or in stylish solid oak. Refined simplicity in fact. Portello from Leolux is a light and practical occasional table, which does precisely what you expect of an occasional table. With the handle under the top petal you can easily move Portello to wherever you want it. Perhaps with the leaf above the seat of your sofa to put the coffee within reach. That's possible because the height of that leaf is cleverly geared to the Leolux furniture.
