

Riletto bed

Riletto bed by Team 7

Recessed slides make our award-winning Riletto bed appear to float. Its optical lightness is also emphasised by its fine proportions. The headboard and sides of the bed can be designed in wood or leather. The leather version gives the bed an exciting material mix. The Riletto bed can be enhanced with stylish consoles if desired. They can be used as practical trays and are available with an integrated drawer. Alternatively, you can combine the Riletto bed with the matching Riletto nightstand. Traditional, metal-free bed joints ensure a healthy sleep environment and make our bed particularly stable.
