

# Showtime vases

Jaime Hayon is the most intriguing figure in new Spanish design. He has energy, talent, and a style of his own, which are all distilled into the Showtime collection he has designed for BD Barcelona design. This happy encounter between a young designer and veteran producer has led to the birth of a furniture collection meant for the home, but which has the adaptability and the personality needed for contract furnishing. A collection in which plastics consort with upholstery, the gleam of lacquered wood and the tradition of fine ceramics. In these contrasts between classicism and modernity, Showtime reflects what has always been the very essence of BD Barcelona Design.

Made in two pieces in enamelled stoneware porcelain; monocolour (interior and external in white) or bicolour (interior in white and external in different colours, according to the model).
