

DS-60 lounge chair

DS-60 by Gordon Guillaumier for de Sede

The designer was inspired by the pure form of a boomerang with its bold yet elegant lines. The slim, floating design is perfectly suited to modern or classically elegant living rooms. Intricate hand-crafted details, including visible ornamental seams and leather-covered armrests, add to the design's elegance. The stainless steel frame is further evidence of the design's exquisite quality, while the creasing of the leather softens the design's sharp lines, giving the piece a light and informal appearance.
