

Gardenias seating collection

The Gardenias Collection is the second largest collection by Jaime Hayon for BD. It has quality, personality, elegance and just the right amount of romanticism and much versatility for the home as well as contract. The indoor collection includes an armchair and a sofa with a more refined image, which we present with new finishes and upholstery.

The structure is made of cast aluminium and laminates are of extruded aluminium. Painted in Alesta Anodic Black. Seat and back-rest are upholstered in BD's different materials and leathers.
