

# DS-19 sofa sectional

DS-19 by de Sede Design Team

A contemporary and daring interpretation of the living space theme, with striking references to the swinging sixties offset against optimum seating comfort.

It consists of a square base module with one or two exterior support elements for back or armrest cushions, offering you numerous combination options. The DS-19 features the unmistakable quality and seating comfort expected of all de Sede products.

The square seat cushion's surface is cross-seamed. This quartering forms the pattern for the cushion elements that complement the base (base element 2x2, plus 2x3, 2x4 and 3x3) – an immediately familiar layout that offers optimum interplay between all elements. The DS-19 is open to almost unlimited combination, serving as the charismatic fulcrum for any living space.
