

# Ninfea Coffee Table

Ninfea offers a wide range of colourful choices and is also very flexible. The three table-tops revolve around a point that the designer has placed just off-centre. So you revolve each table-top for as long as it takes to find the configuration you need. Close together for an uncluttered look or at their maximum size for those special occasions.

Ninfea is available in two versions: "Rondo" with round table-tops and "Clover" with organic leaf-shaped table-tops.

The Ninfea table-tops can be lacquered in every possible colour or can be manufactured in oak (oil or stain). You can choose the colour and materials (lacquer / oak) for each individual table-top.

Also available with ceramic table-tops in the colours/structures of the Leolux Ceramic collection (combination with lacquer/oak not possible). The ceramic table-tops have straight edges.

The steel base is epoxied or lacquered.
