

Stochastic

A suspension lamp with an evocative character, which thanks to the dematerialization of the support elements and the volumetric breakdown takes on a theatrical, poetic character: not just functional quality, but also aesthetic and decorative refinement.

Composed of glass spheres at different heights, the lamp permits infinite combinations, in a sort of "controlled freedom": each sphere is connected to steel rods of different lengths, which are attached to the ceiling in a creative way, giving rise to always different light clusters. Hence the name Stochastic, indicating a random process, in reference to the different possibilities for combining the spheres in unexpected ways, each time leading to a different lamp, a one-of-a-kind creation. A game of imagination whose light source - a double high-efficiency LED module - is enclosed within the spheres, generating warm, diffused indirect lighting, aimed both upward and downward.
