

# Range S 830 Chair

Flowing yet edgy: with range S 830 we have developed a club chair that fits into the most diverse environments due to its versatility. The interaction of curved and straight lines makes it both feminine and masculine – it is precisely these contrasts that provide suspense and elegance to the chair. The comfortable, fully upholstered chair invites you to stay in it with its open formal language, and it is especially flexible: the various versions enable it to be used in the most diverse environments – living, waiting and reception areas or lounges. The visual separation of inside and outside upholstery also allows for a high degree of individualisation; depending on taste and preferences, various fabrics and leathers can be combined.

Chrome-plated or powder-coated tubular steel four-leg frame (S 831), base plate panel brushed stainless steel (S 832), polished aluminium or chrome-plated four-leg cross frame (S 833). We offer a wide range of fabrics and leathers for the upholstered elements. Optionally with swivelable writing panel, which can be mounted into the seat shell.
