

I.Cono table lamp

Design by Lievore, Altherr and Molina.
Made in Spain by Vibia.

I.CONO is the successful symmetry between the new, the now and the essence of Scandinavian design tradition. The aesthetic of the collection is transmitted through a design language of soft, friendly and perfectly understated lines. This design achieves a visual lightness and extremely high quality through the exquisite use of materials and finishes. Even the rotating mechanisms of the head and base seem invisible thanks to the fabricating technology used in creating this collection. All of these are combined cleanly and consistently, while taking each possibility to the limits, achieving an elegant form. The lacquer finish is designed to suit the most modern tastes and is available in black, white or green. All models are available with an energy efficient fluorescent lamp source.
