

# Nox bed - wooden headboard

Nox bed by Team 7

The gently rounded edges that unite at the corners to form a harmonious S-shaped line are characteristic of our Nox bed, along with the material strength of the solid wood. The surfaces of the hand-selected solid wood look particularly impressive in the wood types wild natural oak and wild walnut. The strong grains and visible knots in this range emphasise the natural charm of the living material. The wood pattern of Swiss pine is also unique - just like its pleasant and soothing scent. And the upholstered leather headboard provides additional luxury because its comfortable backrest is perfect for hours of reading pleasure. The headboard is also available in solid wood if you prefer.

Genuine wood, refined exclusively with natural oil, and metal-free beds promote a healthy sleep environment - so that you wake up well-rested day after day. Perfectly coordinated occasional furniture and cabinets with practical functions bring a smile to your face - no matter which foot you got out of bed with.
