

Range S 285 Desk

It is as though Marcel Breuer had anticipated today's home offices and mobile computers: The compact tubular steel desk S 285 that he designed is an elegant companion for modern lifestyle and work.

Marcel Breuer's tubular steel desk S 285 for Gebrüder T 1819 is a successful example of the programmatic Bauhaus claim to combine art and technology into a new unity. The trained joiner combined his knowledge about tubular steel as a material with his experience in interior design. The tabletop and storage elements made of lacquered or stained wood harmoniously fit into the tubular steel frame. The supporting frame consists of a curved line, and the wooden elements characterised by clear forms seem to float in it. The clear piece of furniture with its formally balanced proportions represents an important piece of contemporary history, known as "The New Objectivity". Gebrüder T 1819 produces various versions of this striking model.

Frame chrome-plated tubular steel, body in stained ash, ash open pore lacquer or body lacquered in various colors. Drawers lockable with central lock. Also available as a version with open shelf compartments or in a "Pure Materials" version with oiled walnut veneer.

Current product changes:

- We have equipped the desk's drawers with a self-closing drawer track.
- The desks are also available in a mirror-inverted version. Please indicate on your order!
