

Cubus Pure Sideboards with Flush- Mounted Sliding Doors

The fronts of our Cubus Pure occasional furniture are covered in delicate colored glass, which emphasizes the high-quality solid wood surfaces. The fine glass edge gives the furniture a delicate look, and the recessed plinth creates a light, floating appearance. Particularly striking is the contrast between the homogenous glass surfaces and the vibrant solid wood in our fascinating Venetian oak front option. This unique, hand-picked wood pattern comes from Venetian oak trunks and is characterized by traces of the tides and of mussels.

The versatile design elements open up additional planning options for our Cubus Pure sideboards. With their open design, the solid wood elements perfectly set the stage for displaying the large and small treasures of everyday life. The look of a display cabinet can be accentuated with the optional all-glass doors. The rear wall can set a charming contrast in colored glass, or remain discreetly in the background as wood. The design elements can be also supplemented with dimmable LED lighting if desired.
