

# Aye chair with rotary frame

The Aye chair by Team 7 offers enormous comfort as a swivel chair as well. Thanks to the special swivel and shock-absorbing mechanics, the chair gently rebounds when you sit down and automatically moves forward again when you stand up. The seat shell cups your body like a hand, and the comfort of the upholstery ensures many pleasant hours at the table. Your comfort is also ensured by the flexible backrest, ergonomic armrests and the comfortable, buoyant seat. Aye uses the “Y” design shape in the flare of its four-leg wooden frame and it therefore fits perfectly with the Yps table and bench ensemble.

The chair is available in a single color in either leather or textile upholstery, or in two different colors, using all leather, all upholstery, or one of each. But because we offer so many shades of leather and fabric, be sure you give yourself plenty of time to make your choice.
