

Filigno Highboard 4

A characteristic feature of our Filigno occasional furniture is the delicate casing of genuine solid wood which is elegantly replaced with corner details. The Filigno sideboard and high board with drawer, swinging and sliding doors, as well as with and without design elements, are also available. In terms of fronts, in addition to solid wood, a choice can be made between colored glass and ceramic. For a free-floating occasional furniture giving a light impression, you can choose between Cubus Pure slides or a receding base. Filigno high boards can be fitted with functional interiors for glasses and small devices, including a two-fold socket. Both interiors are fitted with LED lighting.
