

DS-1164 bed

DS-1164 by Hugo de Ruiter for de Sede

The bed collection DS-1164 celebrates the rediscovery of divine sleep. The design principle follows closely in the footsteps of the sofa DS-164 which already enjoy cult status thanks to their 360 degrees rotating backrests. This mechanism has been transferred to beds, the bed-head of DS-1164 can be adjusted to precisely the right position for every occasion - a true premiere in bed design. The bed is available rectangular, oval or round. Standardised elements can be used for the slatted frames and mattresses, to decide by yourself which inner life the sofa should have. A perfect bed for unlimited day and night dreams.
