

Fence

Fence, by Christophe Pillet, is a bench designed to be used both as a seat and as table. Its light and sophisticated design, matching the wire frame continuous band in treated metal rods with the solid Canaletto walnut slats of the top, make it unique for furnishing any living area as well as the bedroom as well. Fence is an accessory standing out for its essential lines that confer it strength and character, profiting from the contrast between natural wood and industrially treated metal.

Structure: Metal

Top: Wood

63" L x 16.5" D x 14.5" H
