

# Alton Armchair

David Lopez Quincoces' Alton armchair has a bold, sculptural quality created by its semi-circular metal structure, which accommodates the clean lines of the backrest, made by hand from over 200 metres of aged natural hide cord. Also available with the backrest in dark brown waxed cotton cord. A sophisticated contrast of styles is created between the bold external lines and the cosy, soft seat pad, which guarantees maximum comfort and is available with a fabric or leather covering.
