

Mirage mirror

Mirage mirror designed by Tokujin Yoshioka consists of many reflecting surfaces fitted with different angles, thanks to a complex wall fitting system. If joined to one another, they confer a pleasant flow to the walls and expand the sense of space, thus increasing the depth of any room. An innovative interpretation of traditional furnishing with irony and lightness, where each unit is refined with a mould recalling the classic mirror processing, matching modernity with tradition.

Single Mirror

7" L x 2.25 - 3.75" D x 59" H
