

Rainbow Sideboard

Roberto Lazzeroni adopts a bold approach to take the traditional shape of a sideboard and to repackage it to create an ideal piece for a contemporary living room. The four-door Rainbow sideboard features a vintage-inspired suspended metal base and an eye-catching graphic façade, with a colour pattern that explains its name. The doors and the lacquered wooden structured can be offered in a single colour or in two different combinations. Particular care has been taken to ensure the doors can open at a 180° angle.
