

Caron Stool

Caron by Frans Schrofer for Leolux

The comfortable Caron bar stool is a Frans Schrofer design and is a clear continuation of the visual language of the Caruzzo, Cantate and Callas models. The Caron finish is also entirely in line: 'Artisan', a skilful decorative seam, is available as alternative for the sturdy zip at the back. All fabrics or leathers from the collection can be selected for the inside and the outside upholstery. The high Caron stool makes the family complete.
