## Coffee and Side Tables

DS-5020 by Simon Busse for de Sede

Available in two different heights, this elegant table construction presents itself in a cylindrical shape, encased all-round in high-quality leather. Designer Simon Busse found the inspiration for this object in the fashion world.

The result of the design process bore a striking resemblance to the sleeve of a men's shirt. To accentuate this, the Stuttgart designer integrated a high quality fixing button that would essentially serve as a 'cuff link'. And there you have it: the gentleman in furniture form.

The tabletop makes this exclusivity complete. It is made of glass or marble and elegantly embedded into the construction.
