

DS-344

Armchair

DS-344 by Bart Van der Heyden, de Sede Design Team and Jonathan Hotz

DS-344 flirts with the legendary era of de Sede. Extraordinarily loosely covered, the armchair embodies a lively leather experience

With its emotional design, DS-344 gives the room a prestigious character. Whether in an elegant library, an executive office or in a living room, DS-344 makes clear style statements.

Technically speaking, DS-344 is based on the already successfully established DS-343 armchair. Like its big brother, DS-344 is truly balm for the spine. With the seating surface extended up to the height of the pelvis, one moves backwards only from pelvic height when leaning back. This ensures an improved posture and prevents the shearing forces that normally occur.
