

Bondi table

Leolux wanted a new shape; a table that adds style to an interior. And Bondi does just that. Its unusual organic leaf shape is the first thing you'll notice. Up to five people can sit comfortably around this table. The three-leg steel frame offers stability, with the upperleaf in oak, walnut or user-friendly Fenix giving the Bondi character. That's how Leolux makes sure you have something to choose from.

The Bondi table leaf is 230 cm x 120 cm and is available in stained oak or walnut.

Or there's the innovative Fenix: an easy-to-maintain nanotech material that makes the leaf soft and warm to the touch.

The steel frame is finished in black powder coating (E2200) or another epoxy color from the Leolux collection.
