

Mime Chair

Gino Carollo introduced some truly subtle details to Mime. The soft folds, the accent on the front of the back support and the beautiful decorative tun-sur-ton or contrast-colour stitching. Mixing seat shells and armless chairs, or using different fabrics on the inside and outside gives the room a playful touch. Various frames are available, each with their own purpose. The combination of Italian elegance and authentic Leolux comfort: that's the power of Mime. The dining chairs are wonderfully comfortable and look stunning.

Features

The sledge "Outline" is finished with a black powder coating (Epoxy 2200). Also available in other lacquer and epoxy colours or chrome.

"Cruz" (pivot base) and "Twist" (pivot base with wheels) are manufactured from polished aluminium. These bases are also available in Leolux epoxy and lacquered colours (as well as in Ral/Sikkens colours).
