

# Coda Side and Coffee Table

Coda by Pascal Bosetti for Leolux

A spacious, practical table is always useful. Coda is more than that though. The stylish wire frame imparts a transparency to these occasional tables and coffee tables, and the wide range of epoxy colours makes combining with Coda fun. Look closely and you'll see subtle differences: the large coffee table has a pentagonal base and an edge that curves back at intervals around the circumference, while the smaller occasional table has a triangular wire frame with a top that only curves back on one side.

Coda tables are practical and quirky, effortlessly combining 'contemporary' and 'timeless'.
