

# K7 kitchen island

Kitchens by Team 7

The centrepiece of the K7 kitchen is the 74 to 114 cm height-adjustable kitchen island. This allows the worktop to be adjusted precisely to individual ergonomic requirements via the flush-mounted control element. The lift technology patented by TEAM 7 and unique globally has almost noiseless operation and is GS-certified (Geprüfte Sicherheit - "Tested Safety"), just like all our kitchens. Unlike the cooking island, the K7 kitchen line only reveals its sophisticated secret upon closer inspection. This is because the flush-mounted pendulum handle which was also developed by us is hidden behind its handle-free design. This is seamlessly integrated in the metal band on the fronts and is revealed with a light tap.
