

# Warp bed

Sartorial softness

With a relaxed, informal style, a balanced design constructed on generous shapes that describe distinctly horizontal lines, the Warp double bed finds its strength in the contrast with the refined vertical tailored seams that models the large padded bedhead, a stylistic element that takes up the design of the Warp sofa. Also available in the container box version. A new refined example of manufacturing that perfectly unites the Italian craft tradition with the newest technologies able to give a profound sense of comfort. Covering available in fabric or leather.
