

# Ella console table

Minimalism with personality

Fine-tuning of materials, lines and pure volumes for the console Ella by David Lopez Quincoces, a piece of furniture that has a calibrated balance at its soul. A new expression of the profound ability of synthesis that the designer David Lopez Quincoces has developed, which is united with his rigorous planning where at the heart is the functionality of the object that cultivates a character through the choice of materials and details. This design is in perfect harmony with the other furnishing items designed by the Spanish designer for Lema. The concept of Ella is a traditional furnishing item, which develops a strong contemporary personality because of the contrast between the lightness of the structure in bronze metal that appears to be floating and the solidity of the drawer in heat-treated oak. A new passe-partout that can be purchased as a stand-alone piece or together with other elements, Ella can insert itself in every style and space thanks to her refined style.
