

Glance Display Cabinet

The sculptural Glance two-door display case and sideboard by Matteo Nunziati combine the presence of heat-treated oak with the lightness of crystal, two materials delicately brought together by the bronze painted aluminium frame around the doors. Wood and crystal - strength and agility - are expertly balanced in a system featuring two sophisticated objects providing storage and display solutions. The Glance display case is an elegant container ideal for the dining room, with angular, full-glass doors which showcase all of Lema's design expertise. Meanwhile, the discreet LED lighting system helps to enhance the stunning interiors and the objects held within.
