

Logica Celata kitchen and bar

Kitchens by Valcucine

Logica Celata - A new project to customize your "food and drinks" experience

Logica Celata, the newest member of the Logica family and the end product of brilliant research into making over space and reinventing ergonomics, has just arrived. It's available in the Bar, Kitchen and Food Preparation models, each of which contains ideas and accessories purposely designed to meet specific requirements. Configurations in which everything is ready to be used as efficiently as can be and then becomes invisible when no longer needed.
