

Mylon chiar

Mylon follows the principles of classic chair construction, except with a contemporary design language, and it can be combined with a wide range of tables. The backrest appears to flow seamlessly from the raised rear legs, giving the chair a streamlined, minimalist appearance. Its elegant curves wrap around the body just like an embrace. With its ergonomically shaped seat surface made of 30 mm thick solid wood, it offers superior seating comfort that goes far beyond that of a regular wood chair. Mylon also presents this comfort in the upholstered version, offering an elastic seat combined with high-quality, breathable fabric or leather covers. Perfectly coordinated, both versions can easily be combined into one table.
