

Filigno writing Desk with Recessed Plinth

In a refreshingly light-footed way, the Filigno writing desk combines practical, analogue storage space with technical features of our digitized world, all packed into a neat, elegant form. A characteristic feature of Filigno is the slim casing of solid wood, just 12 mm thick, made using our innovative three-layer technology - incredibly strong despite the slenderness of the material. A slim, matt black metal frame base echoes the slender lines of the wooden casing, leaves space for the feet and creates a sense of weightlessness. Alternatively, the version with a recessed plinth base offers additional storage space.
