

Echt.Zeit table

The most striking feature of the Echt.Zeit table is its authentically organic-looking table top. It is made from two lengths of untreated wood that were cut from the tree trunk as a single piece. The brushed surface truly brings the natural features of the wood to the fore. The result is a distinctively individual table that is completely unique. Skilled craftsmanship is fundamental to the Echt.Zeit table: from choosing the right piece of wood, to the traditional joining methods that are ideal for living wood and allow easy assembly and disassembly when needed. After all, you will want to take such a one-of-a-kind piece with you everywhere. No matter how often you move your home.

The "leaf" from the TEAM 7 logo locks the two parts of the table top firmly together, and is yet another example of our perfectionist detailing. The neat steel panel supports made of bronzed steel are modestly set back and their structural design ensures maximum stability. A practical accessory is the wooden trivet. Its shape is reminiscent of a plus sign and it certainly offers a plus in comfort: developed specially for the Echt.Zeit table, it can be moved along the centre joint - without slipping sideways.
