

DS-531 sofa

DS-531 by de Sede

Whoever sits down on seating from the DS-531 family - thanks to the lowered seating position, they will not only sit comfortably and restfully, but will also feel comfortable in the stitched leather design. The sweeping frame construction and a wooden shelf for the seat cushions are the simple construction elements of these sculptures, which are available both as three-seaters and as comfortable armchairs with headboards and stools.
