

Meridiano outdoor wall light

The Meridiano lamp collection , designed by Jordi Vilardell, projects a comfortable light that creates patterns of light and shadow, making a magical luminous effect. The Meridiano light is equipped with a LED light source, which provides an indirect light from beneath its cover. The structure of steel rods is organized in a circular arrangement that create shadows onto the adjacent wall. The Meridiano light is manufactured in two colors which clients can choose from: matte lacquered khaki and matte lacquered off-white.
