

Rolf Benz Liv Sofa

With Rolf Benz LIV, Luca Nichetto created a sofa system that can adapt perfectly to the myriad requirements of contemporary living spaces. Here, Italian sofa tradition meets German technology and quality. The result is a breathtaking union of geometric strengths and laid-back comfort. Rolf Benz LIV creates this impression whatever version you choose: as an individual sofa, as a modular sofa or as an armchair.

The geometric structures of Rolf Benz LIV are created by filigree, polygonal metal frames. Featuring comfortable base springs and an adhesive surface, eight different frames act as versatile bases for individual compositions made up of seat cushions, sofa backs and side sections. Two seat depths and two back widths offer a variety of design options in combination with integrated shelving units. Sofas configured in this way can be added to with flexibility and entirely in line with personal seating preferences through a range of loose cushions.

In addition to black and umbra grey, the subtly shimmering shade of Marrone metallic is available for the sofa system's frame and feet. The shelving unit frames are designed in black or umbra grey. The storage areas can be chosen either in brushed graphite brown or Carrara natural stone or in clear glass with an underside painted in black, umbra grey or Marrone metallic.

Liv is available in various sizes a single or modular sofa. Please contact the showroom for more details.
