

# Uma Bench

An elegant object in its discreet aesthetics and innate versatility, Uma gives lightness to the domestic space: perfect whether placed in the bedroom, the living room or the entrance. The sophisticated character is identified in the simplicity of the lines and of their movement emphasised by the combination of different materials: the double structure in bronze painted metal that welcomes the padded seat with double cushion in leather or eco-leather which is flanked by a part left free, at the side or centrally, where there is a heat-treated oak tray integrated into the frame, with millerighe inserts, designed as a container for small objects.
