

Tomo Long Suspension Lamp

Tomo is a lamp whose design is reminiscent of books placed side by side. This thoughtful and earnest lamp was designed by Valencia-based MUT Design Studio.

Tomo is presented as a chain of wood veneer oblongs, with varying heights and widths. The resulting shapes are both graphic and geometric in form. Tomo is designed as a table lamp and a suspension lamp, with dimmable LED, and a light-filtering diffuser. As a table lamp, Tomo's arrangement is evocative of book spines; as a pendant, Tomo appears like an illuminated row of hanging volumes.
