

Klaar Side Table

The glass occasional table, Klaar, is a collaboration between Leolux, designers Studio Truly Truly and the Dutch Glass Museum in Leerdam. Every table is an object in itself as each table is actually blown by hand. The colour schemes are fixed but the patina of the colours is unique for each table.

- Three color schemes: Nougat, Lapis and Mottle
- The glass thickness varies between 4mm and 10 mm
- Klaar is blown by hand and every table is unique. Small indentations, air bubbles and scratches are part of the traditional production process.
