

Hood Coat Rack

It lives with four feet firmly on the ground and its arms are always wide open for something new. And if things get too much for it ... it has a big brother! We are talking about our hood clothes rack, whose slender frame brings to mind a tall tree with its sweeping crown. The interplay of angular and rounded shapes makes it a versatile piece which is a welcome guest in all kinds of entry halls. With its expansive arms, hood offers generous space for jackets and coats, as well as convenient hanging points half way up for bags and other items. When two basic units are connected with a rail, hood becomes hood+ with a width of 110 or 130 cm, adding up to a generously-sized clothes stand for the entry hall or bedroom.

Coat rack available in beech, oak, white oiled oak and walnut.
