

Rolf Benz 964 Round Table

Whether you're with friends or family, with the solid oak Rolf Benz 964 dining table, you'll be dining on cloud 9 thanks not least to the tabletop that appears to float over the supporting frame. In fact, it is connected via a visible metal support to the feet, creating a very special illusion of lightness. The dining table is available in two designs: either with a round tabletop or a rectangular one, with rounded table corners and edges. The tabletop and feet are available in oak and walnut, and the metal support can be produced as preferred in umbra grey or traffic black. Whichever choice you make, the Rolf Benz 964 table matches perfectly with the Rolf Benz 616 chair. And an urban lifestyle.
