

Taso Table

Pure, light and clear in form: this is how our Taso table made entirely from solid wood presents itself.

Manufactured using ultramodern three-layer technology, the table top impresses with its delicate appearance. The pull-out profiles, made entirely of solid wood, are arranged in such a way that even when pulled out, the high-quality look is retained without being able to see or feel the profiles. Round corners and rounded lower edges make the solid wood appear soft. The indented solid wood legs in A-shape offer maximum legroom and generous space for chairs with armrests. Table top, extension profiles and legs – 100% real solid wood.
