

Filigno Coffee Table

With its sleek design, the Filigno coffee table is a new member of the eponymous living range. Innovative three-layer solid wood panels form a delicate passepartout and showcase real solid wood in its unrivalled material slimness. A fine shadow gap between the table top and panels accentuates the delicateness of the design. The integrated folding mechanism allow you to lift the table top of the coffee table, while at the same time bringing it closer to the couch. Perfect for snacking whilst watching TV, or to make a mobile home office. The step function also provides convenient access to the generous storage space inside the coffee table. The slender metal frame base gives the Filigno coffee table a light-weight appearance and creates optimal legroom.
