

Flat Ceiling Light (single)

The FLAT ceiling lights , with LED sources, are made from metallic planes placed at different heights. The surfaces of these planes reflect the light, projecting an enveloping luminance that appears to come from its interior. Delicate yet strikingly graphic, a light that appears to be floating overhead.

Flat lamps are a creation from the designer Ichiro Iwasaki. The discs of light descend from the ceiling to form a pendant, where the planes of reflected light blend in with the architecture. All the models in the Flat collection incorporate LED lighting and are available in a range of neutral color tones.
