

# Flat Floor Lamp

The Flat floor lamp comes in small and large sizes with either a simple or double metal pan, a compact disc, or a plate that acts as an auxiliary piece of furniture. When arranged in pairs the smaller matching disc captures the reflected light within the larger pan thus creating a focus of softer grouped lighting that lights both space as well as the light's own surfaces.

The Flat floor lamp offers multiple functionalities; material and light are integrated in a single body. The Flat collection contains various planes of light that rise up to become self-illuminating supports.
