

Counterbalance Wall Lamp

Design Daniel Rybakken

An object that seems to defy the laws of physics. Positioned as desired in space, the essential Counterbalance LED lamp, with its position variation, suggests the dynamic equilibrium of a sculptural mobile. Equipped with a fluid balancing system using gear wheels, the counterweight compensates for the movements of the long arm and ensures stability of the diffuser. The unit is produced in matte black or white painted steel, with an aluminium cap.

Dimensions

75.4" L x 3.3" D

Height from +75 to - 70"
