

# Gyon Chair

Designer Christian Werner has returned the dining-room chair to its core. The result is Gyon, a design that is entirely composed from basic forms. Werner created a strikingly elegant chair that does not hide its perfect seating comfort. What's more, everyone can add their own twist to the design by having the inside and outside of the chair upholstered in different fabrics. This freedom of choice also applies to the frame. Select a frame with castors or legs.

Gyon is available with a high or low backrest. It may be delivered with a frame named "Swift" (legs) or "Tour" (castors).
